Experience

Full Stack Developer

Bootcoding PVT. LTD.

Nagpur, Maharashtra

Jan 2024 - Present

- Developed the 'ACEINT' platform, an AI-powered interview preparation tool, helping students boost confidence through mock interviews.
- Built a comprehensive mock test module, enabling users to take tests for companies like TCS and Accenture, with an 80% increase in engagement due to an intuitive UI and smooth modal animations.
- Designed and implemented both the front-end and back-end, reducing load times by 30% and ensuring seamless feature integration for an improved user experience.
- Implemented OAuth authentication, allowing users to sign in with GitHub and Google, reducing login time by 50% and improving security.
- Created reusable components and optimized the codebase, cutting development time by 40% and improving maintainability for future projects.
- Optimized the application for better performance across devices and browsers, resulting in a 25% improvement in load speed and a smoother user experience.

Projects

YONOHA (Live Restaurant Listing Application)

Yonoha [🔗](#)

- Developed a front-end web application showcasing restaurants in Nagpur.
- Implemented functionalities like user sign-up/sign-in using Appwrite's auth service.
- Incorporated dark/light mode switching for user preference.
- Tools Used: React JS, Tailwind CSS, Appwrite.

My Portfolio

My Portfolio [🔗](#)

- Developed a front-end web application showcasing my skills and personal information.
- Tools Used: React JS, Tailwind CSS.
